

WOODS • PEACOCK

ENGINEERING CONSULTANTS

Woods • Peacock is looking for talented people interested in developing and advancing a professional career in structural engineering related to building structures. Our projects vary in size and complexity, providing opportunities to grow and challenge your technical skills and develop and/or improve your management skills. Projects are assigned based on your ability, strengths, and motivation.

Position:

- Full-Time Structural Project Manager
- 10+ years of experience in structural engineering with at least 4 years of project management

Location:

- Alexandria, VA
- In Office (occasional remote work after probationary period)

Responsibilities:

- Supervise structural designers and structural engineers
- Project management, reporting directly to Principals
- Communicate and coordinate with architects, engineers of other disciplines, and clients
- Supervise analysis and design of structural systems for all types of building materials using various building codes and standards (i.e. IBC, IEBC, ASCE, AISC, ACI, UFC)
- Participate in field surveys and document existing conditions
- Review and evaluate existing building structural systems
- Write technical reports
- Attend all meetings and conference calls for assigned projects
- Oversee production of Contract Documents (i.e. Structural Drawings and Specifications)
- Oversee the review construction submittals, participate in construction observation, and respond to contractor inquiries
- Schedule staff hours, keep up-to-date on hours spent and cost expended for assigned projects
- Ability to manage all phases of assigned projects from conception to completion
- Review design calculations and details of designers and engineers
- Review scopes of work and prepare fee proposals

Required Qualifications:

- Able to work freely in the US now and in the future WITHOUT sponsorship
- Degree Requirements:
 - Bachelor of Science in Civil Engineering (BSCE), Bachelor of Architectural Engineering (BAE), or Bachelor of Science in Architectural Engineering (BSAE), or equivalent, with coursework specialized towards structural engineering
 - Master's Degree a plus
- Registered PE and/or SE
- Ability to and experience supervising and mentoring structural designers and engineers
- Excellent verbal and written communication skills
- Good organizational, time-management, and team skills
- Ability to work in a fast-paced environment
- Willingness to be challenged and develop new skills

Preferred Qualifications:

- Software Experience: Microsoft Office (i.e. Outlook, Excel, Word, Teams), AutoCAD, Revit, Bluebeam, Tekla Structural Designer, Tedds, RAM Elements, RAM Structural System, RAM Concept, MathCAD
- Experience with Deltek Ajera
- Able to obtain a secret or top-secret clearance, if needed

Benefits:

- 401k (Traditional and Roth) Plan
- End of year performance bonuses
- Health, Vision, and Dental Insurance covered in full
- Paid holidays, Annual Leave, and Sick Leave
